B.A./B.S. in Health and Society

pursuing B.S. degrees also take chemistry courses that are prerequisites for most health care professions programs such as medical school.

All Health and Society majors then take elective courses in three content areas, focusing on the human body, the human mind, and human society.

Health and Society majors cap their undergraduate experiences with a seminar course in which they discuss with their classmates a range of issues in the science, practice, and delivery of health (ms)JJ5.3 (r)5.9 (ea)710.9 (a)7 ce Td[o50-/3 (n)-1.4u23.4 (h ..4 e ()63.4 3)13.8
