Furthermore, the CFA Institute's University Recognition Program ensures that students have the knowledge to succeed at their professional certification examination once they have completed the program.

The Finance curriculum prepares students for success in financial management through coursework and many opportunities for hands-on learning experiences. All finance majors complete coursework in the areas of:

- corporation finance
- investments
- financial institutions and markets

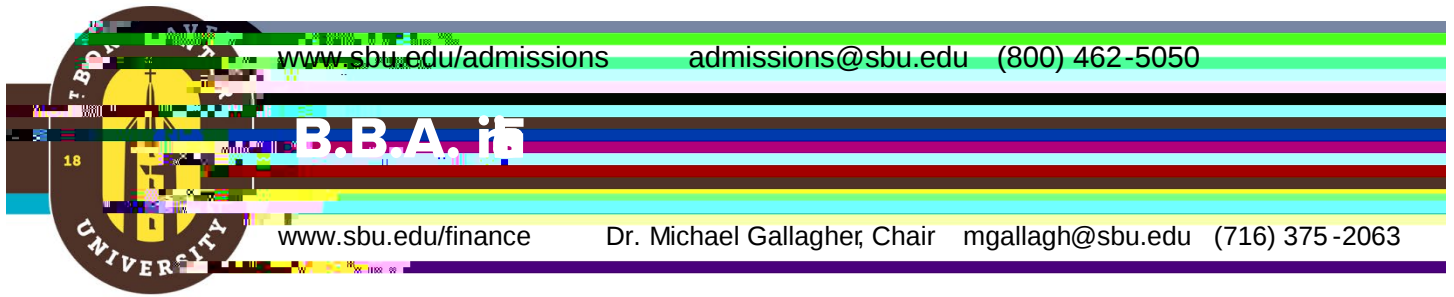

Finance students are required to complete a minimum of 6 elective credits and may choose from

finance during the first two years of study.

Major courses, most of which are taken during the final two years of study, include courses on econometrics, advanced corporation finance, investments and financial institutions and markets.

Those who want a hands-on learning experience
